## **Practice Lead / Manager - Sustainability Practice Area - Truro, NS**

### **About the job**

Looking for a change? Want to be part of a team of the next generation of long standing Nova Scotia businesses? With a clear objective to develop and innovate with our solutions offered to our clients, we are looking to add more dynamic and driven individuals to continue our growth. We are a privately owned firm and with that comes the freedom and flexibility to shape our team culture at the local office level.

**PDI Engineering Group Inc.** is looking for an experienced Engineer of Planner with a background in Civil Engineering, Environmental, and / or Planning to fill our need as a Practice Lead / Manager for our Sustainability practice area for it's expanding team of professionals in Truro. The successful candidate will have the opportunity to work on a wide variety of different projects and work closely with the principals at the firm. **PDI** is a growing firm and the successful candidate will have the opportunity to help shape that growth in terms of company direction, service offerings, project types, and clientele.

We incorporate sustainability into every step of the planning, design, construction and operation phases of your project. Our Sustainability practice area provides clients with solutions that enhance their triple bottom line - the environmental, the social, and the financial. This commitment to re-evaluating processes and technology extends to other aspects of sustainable development. From master planning services to apply environmentally sustainable approaches to community and regional planning, to asset management plans that help communities manage municipal infrastructure assets and make better investment decisions we develop sustainable solutions that create green communities and green businesses as the building blocks of a sustainable society.

### **Key responsibilities include:**

- Managing projects and staff;
- Business development within the practice area and for the overall firm;
- Working with the team to manage and prepare project design drawings and specifications;
- Preparation of design calculations and other project analysis;
- Developing and executing master planning to satisfy Clients needs;
- Assist with, and / or prepare land development, municipal, and building design drawings and specifications;
- Assessing municipal assets and developing asset management plans;
- Preparation of design and other project reports;
- Preparation of project related construction tender / contract documents, and;
- Involvement in business development and associated industry social / professional events.

*Client Satisfaction through Partnership & Efficient Execution*

**Key requirements include:**

- Degree in Civil, Environmental, or Planning;
- Post-secondary Degree in Engineering, Sciences, and / or Business an asset;
- 5 to 10 years experience in engineering design and project management;
- Project Management Professional credential and asset;
- Strong local experience is an asset;
- Eligible for registration as a professional engineer with Engineers Nova Scotia;
- Strong working knowledge of Autodesk's AutoCAD and related engineering software;
- Ability to self-initiate and problem solve;
- Attention to detail;
- Strong written and oral communication (English) skills;
- Ability to work in a team environment and manage people, and;
- A valid driver's license.

**Key benefits:**

- Close working relationship with the principals of the firm;
- Ability to grow and develop with a small local firm;
- Career and personal development opportunities, and;
- Competitive benefits and remuneration packages, including possible company share options.

Our name represents our philosophy:

**Partner - Develop - Innovate**

We **Partner** with our clients and other industry members to understand project needs and objectives in order to execute and deliver on time and on budget.

We **Develop** not only comprehensive project plans, designs and solutions, but also work together with our clients to collectively develop and share knowledge, skills and expertise.

We strive to **Innovate** through our partnerships with our clients and other industry members by delivering comprehensive project planning, design, engineering, and project management services striving to develop the most innovative solutions that are practical and localized to satisfy the needs and objectives of our clients.

We offer you a challenging career in a positive and dynamic work environment. Join our team at **PDI!**
